

## UW-Extension Dairy Team

**Tuesday, January 18, 2017**

**10 am to 12 noon**

Kewaunee County Fair Grounds  
625 3rd Street, Luxemburg

**1 pm to 3 pm**

UW-Extension Fond du Lac County  
400 University Drive, Fond du Lac

No fee for program,  
but **pre-registration is encouraged by January 16**

to ensure materials and light refreshments.

To register, or for more information, please email or call location of choice:

### **Kewaunee County**

Aerica Bjurstrom  
Agriculture Agent  
[aerica.bjurstrom@uwex.edu](mailto:aerica.bjurstrom@uwex.edu)  
920.388.7138

### **Fond du Lac County**

Tina Kohlman  
Dairy & Livestock Agent  
[tina.kohlman@uwex.edu](mailto:tina.kohlman@uwex.edu)  
920.929.3180

When it comes to health issues on a dairy farm, lameness is usually a main concern along with mastitis and reproductive issues. Digital dermatitis is one of the most common foot diseases of the dairy cow and can be found in even well managed dairy herds. Join us on January 18th as we learn more about digital dermatitis, and how to manage it within your herd.

#### **Program:**

#### **Effectively Managing Digital Dermatitis & Other Health Issues in the Dairy Herd**

*Dorte, Döpfer, DVM, PhD, UW-School of Veterinary Medicine*

Dr. Döpfer is a leading authority on dairy cattle hoof health, especially in the diagnosis and treatment of “hairy heel warts” (digital dermatitis). She will share effective practices to manage and reduce the spread of digital dermatitis within the herd.

#### **Walking Strong-Eastern WI Field Survey on the Prevalence of Digital Dermatitis and Hoof Health Management Practices**

*Aerica Bjurstrom, Agriculture Agent, UW-Extension Kewaunee County*

*Tina Kohlman, Dairy & Livestock Agent, UW-Extension Fond du Lac County*

Despite increased awareness of lameness in dairy cattle over the last few years, it remains a major concern for the dairy industry. Controlling digital dermatitis is fundamental to the successful management of the dairy herd. Learn what the prevalence of digital dermatitis is on Eastern WI farms and the practices farms are using to manage the disease.
